CAREER HIGHLIGHTS

- 3+ years of experience across **AI & Data Intelligence, Business Intelligence, e-commerce and operations analytics**, combining commercial data with Machine Learning, LLMs and AI-powered decision-support systems.
- Built and validated **Ads Budget Intelligence and SEO Organic Growth Intelligence AI Agents**, integrating live APIs, Machine Learning, LLMs, forecasting, scenario simulation, recommendation engines and explainable AI, with **328 automated tests passed (206 Ads + 122 SEO)**.
- Developed an **Ads Budget Intelligence AI Agent** processing **3+ years of live Google Ads data — 94K+ records across 37 campaigns and 65 ad groups, covering 21M+ impressions and 3.2M+ clicks**.
- Developed an **SEO Organic Growth Intelligence AI Agent** processing **16+ months of live Google Search Console data, covering 12.9M+ impressions and 837K+ clicks**.
- Built ML forecasting and decision-support workflows using **XGBoost, LightGBM and Random Forest**, alongside feature engineering, model benchmarking, scenario simulation and explainable recommendations.
- Built scalable **Python, SQL, Power BI and Streamlit** analytics systems integrating advertising, search, analytics, inventory and operational data.
- Combines AI/Data development with **business systems analysis, SRS documentation, user stories, acceptance criteria, QA/UAT planning and international SaaS project coordination**.

KEY AREAS OF EXPERTISE

- | | |
|--|---|
| • AI Agent Development & Decision Intelligence | • Forecasting, Scenario Simulation & Optimisation |
| • Python, SQL & Analytics Engineering | • Live API Integration & Data Pipelines |
| • Machine Learning & Predictive Analytics | • Business Intelligence & Operations Analytics |
| • LLM Applications & AI-Assisted Recommendations | • Marketing, SEO & GEO Intelligence |

TECHNICAL SKILLS

- | | |
|---|--|
| • Languages & Data: Python, SQL, Pandas, NumPy | • BI & Applications: Power BI, Streamlit, Microsoft Excel, Jupyter Notebook |
| • Machine Learning: Scikit-learn, XGBoost, LightGBM, Random Forest, Feature Engineering, Predictive Modelling, Forecasting, Model Benchmarking, MAE/RMSE/R ² Evaluation | • Databases & Engineering Tools: PostgreSQL, Docker, Docker Compose, Git, GitHub, VS Code |
| • AI & LLM: AI Agent Development, Agentic Systems, LLM Integration, Anthropic Claude API, Prompt Engineering, AI-Assisted Recommendations, Executive AI Commentary | • APIs & Data Engineering: Google Ads API, Google Search Console API, GA4 Data API, REST APIs, FastAPI, Data Pipelines |
| • Explainable & Decision AI: SHAP, Explainable AI, Scenario Simulation, Recommendation Engines, Risk & Opportunity Intelligence, Budget Optimisation | • Business & Systems Analysis: SRS, Functional Requirements, User Stories, Acceptance Criteria, Role-Based Workflows, KPI Design, UAT, Functional Testing, QA Planning, Agile/Scrum |

PROFESSIONAL EXPERIENCE

E-commerce Specialist & SEO Analyst | Data, BI & AI Automation | Aug 2023 – Present

Vicco | Istanbul, Turkey | On-site, E-commerce Operations

- Designed and developed **Ads Budget Intelligence and SEO Organic Growth Intelligence AI Agents**, combining live APIs, Machine Learning, LLMs, forecasting, scenario simulation, explainable AI and automated recommendations; validated through **328 automated tests (206 Ads + 122 SEO)**.
- Built the **Ads Budget Intelligence AI Agent** using **3+ years of Google Ads data — 94K+ records across 37 campaigns and 65 ad groups, covering 21M+ impressions and 3.2M+ clicks** — for campaign intelligence, forecasting and budget decision support.
- Implemented ML forecasting and model benchmarking using **XGBoost, LightGBM and Random Forest**, including feature engineering, MAE/RMSE/R² evaluation, scenario simulation, risk/opportunity intelligence and LLM-assisted recommendations.
- Built the **SEO Organic Growth Intelligence AI Agent** using **16+ months of Google Search Console data — 12.9M+ impressions and 837K+ clicks** — integrating organic performance intelligence, forecasting, opportunity detection, scenario analysis and LLM-powered recommendations.
- Built **Python, SQL, Power BI and Streamlit** analytics and decision-support workflows integrating Google Ads, GA4, Google Search Console and operational data for marketing, SEO and business performance analysis.
- Built a SKU-level stock health and availability model across **1,000+ active SKUs**, using Days of Supply and **Healthy, Risk and Critical classifications** to improve stock-out visibility and replenishment prioritisation.
- Drove substantial organic search growth over three years through data-driven SEO analysis and optimisation, achieving **+81.1% growth in total ranking keywords, +180.1% in Top-3 keywords and +171.7% in Top-10 keywords**.

Business-Technical Analyst | International SaaS Projects | Jan 2026 – Present

CollegeCornerstone, Freedom House & SMHS | Remote, Canada-Based SaaS Projects | Reference Letter Available

- Serve in a **Senior Business-Technical** role across Canada-based SaaS initiatives, bridging business requirements, technical delivery and stakeholder coordination.
- Lead requirements analysis and produce **SRS documentation, functional requirements, workflows, user stories and acceptance criteria** across multi-role platforms.
- Work with the project owner, coordinator and lead developer to identify requirement gaps, validate functionality and support structured **QA, UAT and market-readiness** activities.
- Support business-side planning for funding-related initiatives, including **Freedom House and SMHS**, while contributing to KPI structures, implementation documentation and financial reporting readiness.

Operations Data & Reporting | International Project | Oct 2025 – Jan 2026

MindArk.ai | Remote, United States | CEO-Signed Reference Letter Available

- Automated operational data preparation for Denmark-region datasets using **Python, Pandas and NumPy**, improving analysis turnaround for regional performance reporting.
- Cleaned, transformed and validated operational datasets used for **KPI aggregation and onboarding workflow analysis**, improving reporting consistency and data quality.
- Applied KPI aggregation and workflow calculations to identify operational efficiency insights and improve regional performance visibility.
- Built **Power BI dashboards** for regional operational KPIs, supporting management visibility and data-driven process optimisation.

Performance Data Specialist – Inventory & ERP Reporting | Dec 2022 – Jul 2023

Abluka | Istanbul, Turkey | Hybrid / International Client Projects

- Analysed inventory performance across **2,000+ active SKUs** using Nebim ERP and Shopify, identifying slow- and fast-moving stock trends to support purchasing and allocation decisions.
- Segmented SKUs by **movement speed, stock risk and replenishment priority**, helping purchasing teams identify inventory priorities and reduce dead-stock exposure.
- Developed structured **stock monitoring and replenishment reports**, improving ERP data visibility across purchasing, commercial and warehouse teams.
- Improved the structure and consistency of ERP-based inventory reporting, supporting more reliable stock control and reconciliation processes.

Operations & Reporting Assistant | Dec 2021 – Sep 2022

Visiosoft A.Ş. | Istanbul, Turkey

- Supported daily **operational reporting and performance monitoring**, improving management visibility across key business functions.
- Designed and maintained structured **KPI tracking reports and recurring performance-monitoring workflows**, supporting more consistent data-driven operational decisions.
- Documented business workflows and reporting processes across departments, improving **process consistency, data reliability and cross-functional reporting alignment**.
- Supported cross-functional teams with analytical reporting and data preparation, building the foundation for progression into **data analytics, BI and automation-focused roles**.

EDUCATION

BSc International Trade | Duzce University | 2017 – 2021

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- **Google Data Analytics Professional Certificate** — Google, 2025
- **Data Science & Operational Analytics (Python & Power BI)** — Europe Coding School, 2025
- **Business Analysis & Project Management** — Europe Coding School, 2025
- **Microsoft Excel for Data Analysis & Operational Reporting** — Microsoft, 2025
- **Introduction to Data Analytics** — IBM, 2025
- **SAP ERP MM & SD Modules (Warehouse & Logistics Training)** — Europe Coding School, 2021
