Visa Status: Seeking UK Skilled Worker Visa Sponsorship | Open to Relocation

Data Analyst with experience working on large-scale operational and demand-driven datasets in high-volume e-commerce environments. Skilled in Python (Pandas, NumPy), SQL, and building end-to-end data pipelines to support near real-time decision-making. Experienced in aligning demand and operational data, developing scalable reporting systems, and transforming complex datasets into actionable insights that improve business performance. Strong background in working with cross-functional teams within Agile environments. Currently expanding into predictive modelling and time-series analysis, with a focus on building production-ready data solutions and applying machine learning to real-world problems. Seeking UK-based Data Analyst / Data Scientist roles where I can apply data-driven decision-making and predictive analytics.

KEY COMPETENCIES

- Supply Chain & Inventory Analytics - SKU-Level Stock Health & Risk Modelling - Warehouse Operations & Stock Control - Inventory Turnover Analysis & Replenishment Planning - KPI, SLA & Fulfilment Performance Monitoring	- SAP ERP (MM, SD) & Nebim ERP - SQL, Python & Power BI Automation - ERP Data Integration & Workflow Optimisation - Demand and Inventory Data Alignment - Cross-Functional & International Team Collaboration
---	---

WORK EXPERIENCE

Operations Data Analyst – E-commerce Operations

Present

Vicco | Istanbul, Turkey | On-site, International E-commerce Operations

Aug 2023 –

- Designed and implemented a SKU-level Stock Health & Availability Analytics Model covering 1000+ active SKUs, significantly improving inventory risk visibility across warehouse operations.
- Developed Days of Supply (DOS) calculations and stock risk classification (Healthy / Risk / Critical), enabling proactive identification of low-stock exposure.
- Built automated low-stock alert logic supporting data-driven replenishment planning and reducing potential stock-out risk.
- Integrated Google Ads & GA4 demand data with real-time Nebim ERP inventory data, strengthening demand-stock alignment between marketing and operations teams.
- Developed end-to-end SQL → Python → Power BI data pipeline, automating KPI dashboards for inventory turnover, fulfilment monitoring, and warehouse performance tracking.
- Enhanced cross-department decision-making by delivering structured operational reporting and performance visibility.

Business Analyst & Project Coordinator Intern (International Project)

Jan 2026 – Present

Freedom House System | Remote (Canada-Based International Project) International Project Reference Letter Available Upon Request

Affordable housing SaaS platform designed to improve housing accessibility for vulnerable and homeless individuals.

- Led Agile coordination of cross-functional international team (development, UI/UX, database, testing), ensuring structured sprint planning and milestone delivery.
- Translated housing access requirements into structured user stories, backlog prioritisation, and MVP-aligned roadmap
- Designed AS-IS / TO-BE workflows, use cases, and process documentation supporting scalable platform architecture.
- Established KPI tracking and reporting framework to monitor module readiness and delivery performance.
- Improved alignment between technical and functional stakeholders, reducing delivery ambiguity and increasing structured execution.
- Supported documentation and process preparation for funding-readiness initiatives.

Operations Data & Reporting Intern (International Project)
2026

Oct 2025 – Jan

MindArk.ai (USA) | Remote, United States (Based International Project) | CEO-Signed Reference Letter Available upon Request

Knowledge-capture and onboarding intelligence platform operating across international markets.

- Collected and structured Denmark-region operational datasets to support regional performance analytics.
- Performed Python-based data cleaning, transformation, and exploratory analysis (Pandas, NumPy), improving reporting accuracy and dataset consistency.
- Applied aggregation logic and KPI calculations to evaluate onboarding workflows and operational efficiency.
- Automated dataset preparation processes, reducing manual reporting effort and increasing analysis efficiency.
- Built Power BI dashboards visualising key operational KPIs, enhancing management visibility and data-driven decision support.
- Contributed analytical insights supporting process optimisation within international SaaS environment.

Performance Data Specialist – Inventory & ERP Reporting
Abluka | Istanbul, Turkey | Hybrid / International Client Projects

Dec 2022 – Jul 2023

- Analysed inventory performance across 2000+ SKUs using Nebim ERP and Shopify systems.
 - Developed structured stock monitoring reports supporting purchasing and replenishment decisions.
 - Identified slow-moving and fast-moving inventory trends to optimise stock turnover and planning accuracy.
 - Enhanced warehouse reporting visibility and ERP data accuracy across commercial teams.
-

- Supported daily operational reporting and performance monitoring, improving visibility of key business metrics.
- Prepared and maintained structured KPI reports, contributing to more accurate and data-driven decision-making.
- Tracked workflows and documented processes to enhance consistency and data reliability across operations.
- Assisted cross-functional teams with reporting and analysis, supporting process optimisation initiatives.
- Contributed to improving data accuracy and reporting quality across multiple business functions.

EDUCATION & CERTIFICATIONS

BSc International Trade | Duzce University

2017 – 2021

- SAP ERP MM & SD Modules (Warehouse & Logistics Training) – Europe Coding School 2021
- Supply Chain Logistics – Rutgers University (Coursera) 2026
- Warehouse & Health & Safety Certifications – Alison 2026
 - Diploma in Warehouse Management
 - Health & Safety at Work
 - Manual Handling Safety Training
- Google Data Analytics Professional Certificate – Google 2025
- Data Science & Operational Analytics (Python & Power BI) – Europe Coding School 2025
- Business Analysis & Project Management – Europe Coding School 2025
- Microsoft Excel for Data Analysis & Operational Reporting – Microsoft 2025
- IBM Introduction to Data Analytics – IBM 2025
